

Model Essay for Q1 – Traffic Congestion

Solving the Problem of Traffic Congestion in Hork

Introduction

Due to Hork's rapid economic development, our population has steadily grown, resulting in a densely populated town. Currently, Hork is one of the most urbanized areas in South East Asia. As the significant population tries to maneuver through the city, carrying out their varied socio-economic activities, traffic congestion has become a considerable challenge that the city faces. To put this problem into perspective, traffic congestion is costing the city a huge amount with reported loss of revenue in the tune of \$720 million in 2019. If the problem is not addressed and appropriate solutions implemented, our city is going to continue losing whopping amount of revenue each year.
